

2007 Q3 link clearance: Microsoft blogger edition

 devblogs.microsoft.com/oldnewthing/20070928-00

September 28, 2007

Raymond Chen

A few random links that I've collected from other Microsoft bloggers.

- [The Microsoft fallacy](#) by [Nadyne Mielke](#).
- [The history of cards.dll](#) as told to [Adam Nathan](#).
- [Hur hamnade den svenska versionen av Internet Explorer 7 med felaktig menytext för kommandot "Nytt Fönster"?](#) (How did the Swedish version of Internet Explorer 7 wind up with incorrect menu text for the "New Window" command?) You'll have to be able to read Swedish to understand the explanation.
- [Group Policy Setting Reference for Windows Vista via the Microsoft Consulting Services infrastructure team in Ireland](#) (wow what a mouthful).
- If you want to learn more about [Timewarp](#) (which has saved me on more than one occasion), you can check out [a Channel9 presentation with the Timewarp team](#).
- [Add .url as a searchable file type](#) and you can search your Favorites.
- [EldarM](#) describes [The five worst problems of home-grade routers](#): Home networks that gave Windows Home Server the heebie-jeebies.
- [Heather Leigh](#) has tips for [increasing the odds of getting your resume in front of the hiring manager](#).
- [The Filing Cabinet](#) (a blog on file services and storage) provides [tips on using offline files with network attached storage and instructions on how to update your offline files cache when the server name changes](#).
- [Tim Newton](#) explains the relationship among sessions, desktops, and window stations.
- ["If you don't get a naked dwarf in my office by this afternoon, I'm coming over there to get one for myself."](#) Taken out of context, that's a pretty strange statement to make in a business meeting. [James O'Neill](#) explains the circumstances.
- Do black pixels really consume less energy? [Danny Thorpe](#) pulls out his power meter and finds out.
- [Robert Hensing](#) introduces us to [hybrid sleep](#).
- [Chris Jackson](#) opines on [software personalization](#).
- [Arlindo Alves](#) shows how to use group policy to [block the use of USB storage devices aside from the ones you explicitly permit](#).

- [Vishal Singh](#) from Windows Application Experience (a group which includes the [Application Compatibility team](#)) teaches us about [virtualized files](#), a mitigation for applications that assume administrative privileges. [Additional application compatibility resources](#) can be found on TechNet.
- The [Terminal Server team blog](#) shows off the new [multimonitor remote desktop client](#).
- [Kieran Snyder](#) reminds us that [word breaking is more than just looking for spaces](#). [Jonas Barklund](#) takes a break from correcting my Swedish grammar to give [a concrete example of the difficulties with word breaking in Japanese](#).
