Now that Wikipedia has catapulted the wiki into the general consciousness, where there's a wiki, a spoof of a wiki can't be far behind.

- [Uncyclopedia](#) is the alternate-universe [Wikipedia](#). Consider, for example, [what it has to say about the television show *Heroes*](#).
- [Smugopedia](#). You think you're so great. (Not actually a wiki, but I had to put it somewhere.)
- [Frakr](#), a parody of [Battlestar Wiki](#).
- [Wikiality](#) brings [truthiness](#) to the Web.
