The latest technologies in plaintext editing: NotepadConf

August 7, 2014

Raymond Chen

On ~~November 13, 2014~~ November 14, 2014, Saint Paul, Minnesota will be the home to NotepadConf, which bills itself as "the premier technology conference for Notepad.exe users and text enthusiasts." I'm still not sure whom Microsoft will send to the conference, but maybe that person could give a talk on how you can use Notepad to take down the entire Internet.

Update: The conference has been rescheduled to Friday the 14th.
