The same individual sold 620 million user accounts from 16 other companies earlier this week.

An individual who earlier this week was selling 620 million user records stolen from 16 companies has now put up a second batch of hacked data totaling 127 million, originating from eight companies.

The data is currently being sold on Dream Market, a dark web marketplace where crooks sell an assortment of illegal products, such as user data, drugs, weapons, malware, and others.

The individual selling the data goes by the name of Gnosticplayers, and it's currently unclear if they're the one/ones who hacked the 24 companies, or just a third-party who purchased the data from the real hacker and is now re-selling it for a bigger profit.

According to tech news site [TechCrunch](#), who first reported this new batch of hacked accounts going for sale on Dream Market, Gnosticplayers is asking for roughly four bitcoin, which is about \$14,500 in fiat currency. Prices vary depending on the quality of the user data and the difficulty in cracking password hashes.

This second batch of hacked accounts includes data from the following companies:

Company	DB size	Breach date	Price	Content
---------	---------	-------------	-------	---------

Ge.tt (file sharing service)	1.83 Mil	2017/12	฿0.16	firstname, lastname, password hash (SHA256), Facebook ID, referer
Ixigo (travel and hotel booking)	18 Mil	2019/01/01	฿0.262	password hashes (MD5), full name, Facebook URL, IP address, username, email, and, for some users even the passport ID number, passport name etc
Roll20.net (gaming)	4 Mil	2019/01/01	฿0.0582	name, email, passwords (bcrypt), nickname, gaming data, some redacted financial data, server log data
Houzz (interior design)	57 Mil	2018/07	฿2.91	email, password (SHA256), registration date, name
Coinmama (cryptocurrency exchange)	0.42 Mil	2017/08/02	฿0.3497	email, password (PHPASS), other unspecified
Younow (live streaming)	40 Mil	2017/10	฿0.131	
StrongHoldKingdoms (gaming)	5 Mil	2018/09	฿0.291	username, email, password (HMAC-RIPED160), profile stats, gaming data, SteamID
Petflow (pet food delivery)	1 Mil	2017	฿0.1777	email, username, password (MD5), other undisclosed data

Of the companies listed above, [Houzz](#) had already come clean about its data breach last week. The other seven companies did not publicly reveal any security breaches before the publication of today's ads.

This new batch of stolen databases comes after [earlier this week](#), the same Dream Market user was selling the following user databases from 16 other companies:

Company	DB size	Breach date	Price	Content
Dubsmash (video sharing)	161.5 Mil	2018/12	฿0.549	user ID, password (SHA256), username, email, language, country, more
500px (image hosting)	14.8 Mil	2018/07	฿0.217	username, email, password (MD5, SHA512, or bcrypt), first and last name, birth date, gender, city, country

EyeEm (image hosting)	22.3 Mil	2018/02	€0.289	email and password (SHA1)
8fit (fitness app)	20.1 Mil	2018/07	€0.2025	email, password (bcrypt), country, country code, Facebook token, Facebook profile picture, name, gender, and IP address
Fotolog (photo app)	16 Mil	2018/12	€0.52	email, password (SHA256), security question and answer, name, location, various profile data
Animoto (video editing service)	25.4 Mil	2018	€0.318	username, password hash (256), email, country, full name, and date of birth
MyHeritage (family genealogy service)	92 Mil	2017/10	€0.549	email, password hash (256), account creation date
MyFitnessPal (UnderArmor's fitness app)	150 Mil	2018/02	€0.289	user ID, username, email, password hash (SHA1) with a fixed salt, IP address
Artsy (art sharing portal)	1 Mil	2018/04	€0.0289	email, name, IP addresses, location, and password (SHA256)
Armor Games (online gaming)	11 Mil	2018/12	€0.2749	username, email, password (SHA256), date of birth, gender, location, and profile data
Bookmate (e-book and audiobook app)	8 Mil	2018/07	€0.159	username, email, password (SHA512 or bcrypt), gender, date of birth, and profile data
CoffeeMeetsBagel (dating app)	6 Mil	late 2017 to mid-2018	€0.13	full name, email, age, registration date, and gender
DataCamp (coding platform)	0.7 Mil	2018/12	€0.013	email, password (bcrypt), location, and profile data
HauteLook (online shopping)	28 Mil	2018	€0.217	email, password (bcrypt), and name
ShareThis (social sharing widget)	41 Mil	2018/07	€0.217	name, username, email, password (DES), gender, date of birth, and profile data
WhitePages (online phone book)	17.7 Mil	late 2017	€0.434	name, email, password (SHA1 or bcrypt)

[Animoto](#), [MyFitnessPal](#) and [MyHeritage](#) previously disclosed breaches last year. [DataCamp](#), [500px](#), [Dubsmash](#), [EyeEm](#), [Artsy](#), [8fit](#), and [CoffeeMeetsBagel](#) confirmed this week that they've been breached as well, giving credence to the seller's boast that this is real data and not just a scam.

These 16 databases are no longer available for sale now. Gnosticplayers said he took them down after buyers complained that a prolonged sale would eventually lead to some of these databases leaking online, and becoming available to everyone.

More updates to follow as we're still looking at the data.
