

# Cyber Threat Intelligence for Banking & Financial Services

---

[blueliv.com/cyber-security-and-cyber-threat-intelligence-blog-blueliv/rooty-dolphin-uses-mekotio-to-target-bank-clients-in-south-america-and-europe/](https://blueliv.com/cyber-security-and-cyber-threat-intelligence-blog-blueliv/rooty-dolphin-uses-mekotio-to-target-bank-clients-in-south-america-and-europe/)

We highlight the most common cyberthreats facing Banking & Financial Services and how threat intelligence can reduce risk of cyberattack:

Banking and Financial Services organizations are high-profile targets for cybercriminal activity and subject to enormous risk. They are 300 times more likely to be targeted by an attack than any other industry and highly susceptible to data breach. They face a plethora of cyber threats including malware and ransomware with threat actors looking to exploit weak spots to cause maximum disruption for financial gain.

**Download our latest whitepaper as we highlight the most common cyberthreats facing FSIs and how threat intelligence can reduce risk of cyberattack:**

- The current state of the industry and why financial services is being targeted
- Cyberthreats and threat actor groups targeting FSIs
- How FSIs can manage their cyber-risk using actionable threat intelligence
