

# Living Off The Land on a Private Island: An Overview of UNC1945

 [brighttalk.com/webcast/7451/451508](https://brighttalk.com/webcast/7451/451508)

## Presented by

Mandiant Threat Experts

## About this talk

Through Mandiant investigation of intrusions between February 2018 through September 2020, the FLARE Advanced Practices Team observed a group Mandiant tracks as “UNC1945” compromise and operate against a tailored set of targets within the financial and professional consulting industries by leveraging access to third-party networks. Please join Mandiant’s Justin Moore and Jacob Thompson, for a look at UNC1945, including the group’s:

- Demonstrated access to exploits, tools, and malware for multiple operating systems
  - Exploitation of an Oracle Zero-day
  - Disciplined interest in covering or manipulating their activity
  - Advanced technical abilities during interactive operations
