Data extraction:

- AntiAnalysis (VirtualBox, SandBox, Debugger, VirusTotal, Any.Run)
- Get system info (Version, CPU, GPU, RAM, IPs, BSSID, Location, Screen metrics, Installed apps)
- Chromium based browsers (passwords, credit cards, cookies, history, autofill, bookmarks)
- Firefox based browsers (db files, cookies, history, bookmarks)
- Internet explorer/Edge (passwords)
- Saved wifi networks & scan networks around device (SSID, BSSID)
- File grabber (Documents, Images, Source codes, Databases, USB)
- Detect banking & cryptocurrency services in browsers
- Steam, Uplay, Battle.Net, Minecraft session
- Install keylogger & clipper
- Desktop & Webcam screenshot
- ProtonVPN, OpenVPN, NordVPN
- Crypto Wallets

Zcash, Armory, Bytecoin, Jaxx, Exodus, Ethereum, Electrum, AtomicWallet, Guarda, Coinomi, Litecoin, Dash, Bitcoin

- Crypto Wallet Extensions from Chrome & Edge

Binance, coin98, Phantom, Mobox, XinPay, Math10, Metamask, BitApp, Guildwallet, iconx, Sollet, Slope Wallet, Starcoin, Swash, Finnie, KEPLR, Crocobot, OXYGEN, Nifty, Liquidity, Auvitas wallet, Math wallet, MTV wallet, Rabet wallet, Ronin wallet, Yoroi wallet, ZilPay wallet, Exodus, Terra Station, Jaxx.

- Messenger Sessions, Accounts, Tokens

Discord, Telegram, ICQ, Skype, Pidgin, Outlook, Tox, Element, Signal

- Directories structure
- Filezilla hosts
- Process list
- Product key
- Autorun module

Features:

These functions will become available in the builder only if you have autorun enabled.

-  **Keylogger:**
The keylogger will turn on if the user is texting in the chat or using the bank's website.
-  **Clipper:**
Clipper turns on and replaces crypto wallet addresses in the clipboard when a user makes a transaction.
-  **Webcam screenshots:**
Webcam screenshots will be taken if the user is watching something obscene on the Internet.
