This is not a crack and not a reverse either. Pandora hVNC Source codes have been completely leaked. There are so many shitty hvncs, Pandora is one of them. I'm sharing it so that you don't pay for such things for nothing. If you have any error problems or need any other help, you can contact me via telegram. Telegram: @BONBONATHY in the sequel are going to show up soon.....

Question&Answer

What is Hidden VNC Hidden VNC is technique used by most advanced users, and by fark the most exciting way to manage your Computer System hidden without interacting with the main desktop at all, simply because it creates a new hidden desktop. Since you mentioned that the software is used by advanced users, does it imply that i won't be able to use it since i am a intermediate user Absolutely not, the software is desinged for intermediate users as well allowing you with click of a button to manage your computer systems. What can i do with it? Once the Hidden VNC is installed on your remote computer, you will be able to interact with it sliently without any pop ups. Is the Software compatible with all windows versions? **Yes it is compatible with all Windows Versions 32/64 bit except Windows Xp and Vista.
