

Beyond Banking: IcedID Gets Forked

★ spreaker.com/user/16860719/proofpoint-e29-mix-v1

At least three threat actors are ushering in a new era for IcedID, originally classified as banking malware in 2017. In this episode, Proofpoint researchers, Joe Wise and Pim Trouerbach, are here to share their research on the Lite and Forked IcedID variants

Join us as we discuss the following:

- Lite IcedID Variant
- Forked IcedID Variant

- The key differences between the variants
- Which operators the Proofpoint team hypothesizes are behind the attacks
