🚩🚩 ThreatMon's latest #report is out! 🧠🤖 The Amnesia Stealer, first detected by #ThreatMon on September 17, 2024, is a highly sophisticated and customizable information-stealing malware. Operating as a service, it is widely available on underground forums due to its open-source nature. Its user-friendly interface and accessibility make it a significant threat, even for attackers with minimal technical expertise. The #malware can steal sensitive data such as browser passwords, Discord tokens, cryptocurrency wallets, and Wi-Fi credentials, posing a serious security risk. 🔍 This report provides an in-depth analysis of Amnesia Stealer's capabilities, including its advanced features like keylogging, clipboard hijacking, and the ability to bypass Windows Defender, along with its potential to inject additional malware like trojans and cryptocurrency miners. 🖱️ Download the report now: <https://lnkd.in/eWtJycwX> #MalwareAnalysis #ThreatIntelligence #stealer #PhishingAttacks #botnet #amnesiastealer #CyberThreats #StealerMalware #SecurityAwareness
